

CAR AIR PURIFIER

The car air purifier disinfects, deodorizes and sterilizes the car interior with the introduction of low quantities of ozone and negative ions in the vehicle. The use of environmentally friendly ozone which destroys odors and sterilizes air and surfaces by direct oxidation leaves no residue, unlike conventional deodorizers which perform the act of masking a bad odour by a pleasant smell. The pleasant smell is not always environmentally friendly and causes long term health issues to the vehicle occupants.

The car purifier performs the following functions:

- Freshens the air in the interior
- Removes dust and pollens that carry allergies
- Kills bacteria and germs
- Increases energy of people
- Reduces tiredness
- Removes smell and odors
- Disinfects and sterilizes the car interior

Specifications:

Input Voltage: 12/24 V DC
Power: < 1 W
Negative ions :> 2 million pcs/cm³
Ozone Concentration: < 0.03 ppm
Size : 92 mm (L) x37 mm Dia.
CE markings for industrial applications.

The equipment easily fits in to the cigarette lighter of the vehicle dashboard. The LED indicates when the unit is in operation. The unit is especially useful in removing the air conditioning associated diseases like smell as well as negative effects on the body and the eyes.
